

in Composite Materials

The importance of Fumed Silica as thickening and thixotropic agent for laminating resins and gelcoats based on *unsaturated polyester resins* and *vinyl ester resins* has increased over the years.

This means that the volume in this application is significant.

As a guideline we can mention:

	KemituraSil 200	AM-1-175
Gelcoat (1,7-2,00%)	X	
Laminating resin (1%)		X
Laminating resin, Vinyl Ester basis (1-1,5%)		X
